Report of the President

October 2012

To the Board of Trustees, Alumnae, Faculty, and Friends of Wellesley College:

I am pleased to submit the annual financial report of Wellesley College for the 2011–2012 academic year (Fiscal Year 2012). This past year was marked by strong financial management, innovation in the liberal arts, and student successes, as well as by our having moved forward with a number of important institutional initiatives—initiatives that will shape Wellesley's course for years to come.

The reports that follow—from Andrew Evans, vice president for finance and treasurer, and Deborah Foye Kuenstner '80, chief investment officer—represent an in-depth look at the financial status of the College and the performance of our endowment. They tell an important story about the financial strength of the College and—despite a challenging economic climate— Wellesley's ongoing commitment to investing in our institutional priorities.

Following are just some of the highlights of the ways in which we are advancing institutional priorities and supporting our mission of educating women who will make a difference in the world:

A Thriving Intellectual Community

Wellesley's intellectual community continues to be fundamental to the vibrancy of our campus; compelling speakers, programs, and events invite us to think critically, explore our beliefs, challenge our assumptions, and broaden our perspectives. This past year two notable examples were the 2011-12 Wilson Lecture, which was delivered by Amy Smith, an inventor, humanitarian engineer, and the founder of MIT's D-Lab, or Development Lab; and, in January, a discussion hosted by Wellesley's Albright Institute for Global Affairs on the need to refocus world institutions on the global challenges of the 21st century, with former Secretary of State Madeleine Albright '59; James Wolfensohn, former World Bank President; and Suzanne Nossel, executive director of Amnesty International. (We were additionally fortunate to have James and Elaine Wolfensohn '58

serve as the 2012 Mary Jane Durnford Lewis '59 Distinguished Visiting Professors for this Institute.)

But our sense of "intellectual community" is not just about the speakers and guests we host on such occasions; it is much more consistently defined by the students, faculty, and staff who live and work here every day. This past year, we were strengthened in this respect by the following:

- We hired 14 new tenure-track faculty;
- We awarded tenure to eight Wellesley faculty members;
- Our faculty received a wealth of impressive grants supporting their research, including three that total \$2.6 million; and
- Forty-one students and alumnae won national fellowships and scholarships, including the Fulbright Fellowship, the Thomas J. Watson Fellowship, the Mellon Mays Undergraduate Fellowship, and those from the National Science Foundation.

A Focus on Innovation

Throughout its history, Wellesley has been a leader in pedagogical innovation in the liberal arts. This was true for the first classes of women who attended Henry Durant's Wellesley in the 1870s, and it remains true today. Just a few examples from this past year: the continued success of the First-Year Seminars, which immerse students in our rich intellectual tradition; redoubled efforts to support interdisciplinary teaching and courses; a new certificate program in sustainability, offered through our collaboration with Babson and Olin Colleges; and a symposium led by Library and Technology Services on Liberal Arts Learning in the Digital Age.

Additionally, a number of Wellesley faculty, staff, and students have been recipients of grants from the Mellon Presidential Innovation Project Fund (offered through the Three-College Collaboration). Their projects included the establishment of an international visiting artist series, the development of a global student-leader consortium, and the improvement of teaching and learning through pedagogical research and training.

Finally, Wellesley was honored for our innovative work in faculty retirement. One of only 15 institutions in the nation to receive such recognition, the College was awarded a \$100,000 grant from the American Council on Education and the Alfred P. Sloan Foundation to continue this effort. Faculty emeriti are an important part of our community, and I was delighted that Wellesley was recognized for this commitment.

Advancing Women in the World

Together with our sister schools and the U.S. State Department, Wellesley recently founded the Women in Public Service Project (WPSP)—aimed at educating and training emerging leaders around the world—and hosted a successful inaugural institute this past summer. Fifty delegates from around the world came to our campus in June to participate in an intensive two-week experience, with opening ceremonies attended by both Secretary of State Hillary Clinton '69 and former Secretary of State Madeleine Albright '59.

For more than 135 years, Wellesley has invested in women and in their leadership potential, so it was both exciting and gratifying to be a founding partner of such an important initiative. Going forward, the WPSP will rotate future institutes among the campuses of the founding institutions and continue to mount programs and global conversations with the goal of advancing women in public service, further perpetuating what Wellesley and its Project partners already do so well—preparing women for leadership.

Wellesley 2025

Over the last year, we launched a major multiyear initiative to rethink, reinvent, and repurpose our campus and its buildings, bringing new life to these essential elements of the Wellesley experience and upgrading our facilities to respond to the challenges of the 21st century. This precious infrastructure demands ongoing care and is the focus of the most ambitious campus renovation in more than a century. Wellesley 2025: A Plan for Campus Renewal will let us attend to significant and pressing needs not only in the residence halls, but also in our classrooms, labs, and studio spaces, both to better address the ways in which students live and learn today and to plan for future flexibility in these living and learning spaces. Wellesley 2025 is a wonderful opportunity to invest in our campus, focusing on those areas in critical need of attention as well as re-envisioning the spaces within our historic and iconic buildings to better fit with our academic priorities and goals.

Wellesley has been able to move forward with these and other initiatives thanks to the dedication and generosity of our College community—including our faculty, staff, alumnae, parents, and friends. Even as we continue to navigate a difficult economic environment, we are advantaged by strong financial management, a profound commitment to institutional priorities, and a dedicated community that cares deeply about the future of the College.

Thank you for making Wellesley the special place that it is.

Respectfully submitted,

H. Kim Bottomly

President

Report of the Vice President for Finance and Treasurer

October 2012

To the Board of Trustees of Wellesley College:

This Annual Report presents the operating and audited results at Wellesley College for the fiscal year ending June 30, 2012, during which the College's net assets decreased by \$89.4 million. The endowment decreased as well—by \$55 million—and was valued at \$1.445 billion as of June 30, 2012.

Results of Fiscal Year 2012

During Fiscal Year 2012 Wellesley, always a remarkable institution, remained academically and financially strong. There was a gain from a positive investment return (0.7 percent) on the endowment, but this gain was offset by spending needed to support College operations. The endowment per student decreased by 2 percent—from \$666,135 to \$652,604—against gifts of \$39.4 million. Finally, funds used during the year to support the operating budget and various capital projects were 5.3 percent of the endowment market value for the one-year—and 5.8 percent of the three-year—rolling average. (A detailed discussion about our endowment appears in the Chief Investment Officer's report.)

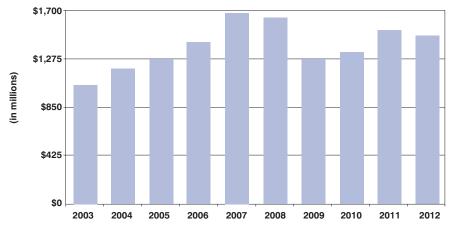

The operating budget (Schedule A on page 13) in this fiscal year reflects revenues of \$236.3 million and expenses of \$235.9 million, resulting in an operating surplus of \$452,000 before addition to reserves.

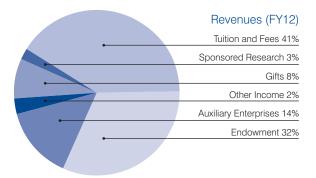

The revenue base for the operating budget was well diversified, with five primary revenue sources: tuition income (41 percent); endowment (32 percent); auxiliary enterprises, including room and board (14 percent); gifts used for operations (8 percent); and other sources of revenue, including sponsored research (5 percent). Total operating revenues in this fiscal year essentially remained the same as for the previous year—even with a decrease in endowment income of \$3.3 million (4 percent).

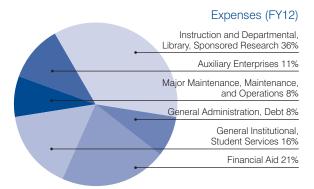

Operating expenses had an incremental increase of 1.5 percent over Fiscal Year 2011. As would be expected in a labor-intensive institution, about 50 percent of the operating budget was used for salaries and benefits.

At the end of each fiscal year, the College's interestrate swap on the Series I variable-rate revenue bonds is "marked to market" (which means that the market value of the swap is reflected in the audited financial statements). As of June 30, 2012, the College recorded a liability of \$16.3 million (reflecting the mark-to-market of the swap) due to low U.S. Treasury rates on that date. This represents an increase from the value of a \$4.9 million liability as of June 30, 2011 and results in a \$11.4 million decrease to the College's net assets for Fiscal Year 2012.

Bond Issuance

In late March, the College finalized the issuance of \$150 million in bonds, with \$100 million of the total to be used primarily for Wellesley 2025: A Plan for Campus Renewal (W2025) projects, and \$50 million to be applied to refinancing the existing Series H bonds to achieve savings. In advance of bond issuance, two rating agencies, Moody's and Standard and Poor's (S&P), rated the College at Aal and AA+, respectively. The replacement combination of tax-exempt (Series J) and taxable (Series K) bonds was issued at historically low interest rates, with the all-in interest rate at 4.37 percent for our tax-exempt bonds and 4.03 percent for the taxable bonds.

A portion of the taxable bonds (\$45 million) was issued at this time even though the College does not plan to spend the proceeds for the next three years in order to take advantage of the historically low interest rates. These monies have been invested in a fund recommended by the Investment Office and approved by the Board of Trustees Investment Committee.

Financial Strength and Flexibility

The College operates under a set of principles focused on financial strength and flexibility. These principles were established to support Wellesley College's institutional values and strategic priorities by preserving the purchasing power of the endowment, ensuring that the growth rates of income and expenses are in balance, and creating reserves to mitigate unanticipated shocks to a balanced budget.

The College's endowment-spending policy attempts to address the need for a strong, stable, and growing income stream from the endowment to support operations and to address the long-term objective of maintaining its purchasing power. The methodology for setting annual spending from the endowment is based on a combination of the prior year's spending and endowment value. As a general rule, the total amount spent needs to be within a 4.0 percent to 5.5 percent range of the prior-year market value of the endowment; in addition, the spending policy sets a ceiling for the maximum amount to be spent each year at 5.5 percent of the trailing three-year endowment value average. In Fiscal Year 2012, owing to the change in spending policy, the College reduced its spending by \$2 million to honor this ceiling. However, even with this reduced spending from the endowment for operations, the College achieved an operating surplus for the Fiscal Year 2012.

The budget process for the College is a multiyear one. It is built around institutional priorities, allowing for inclusiveness and institution-wide input, and using all sources of funds, including restricted-income sources. In building the budget for each fiscal year, the Provost Budget Committee (which the Provost chairs) ensures that the College's budget aligns resources to serve its academic mission.

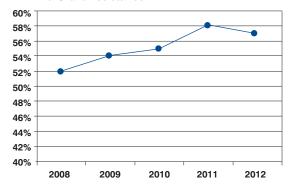

Institutional Values and Priorities

One of the College's longest-held institutional values has been our need-blind admission policy. Wellesley believes that students should be considered for admission solely on the basis of their talents and personal qualities, rather than their ability to pay. At the same time, the College continues to measure the effects of this important policy against other expenses. Over the past five years, there has been an increase in the use of unrestricted resources for financial aid (shown

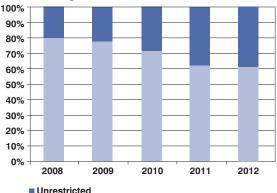

below). While the percentage of students receiving financial-aid assistance has remained fairly constant over the past five years (52 percent to 58 percent), the percentage of student financial aid expenditures supported by restricted revenues has decreased from 80 percent in 2008 to 62 percent in 2012, resulting in a growing need to use our unrestricted resources to fund this important College value.

The maintenance and enhancement of the College's significant physical assets is also an important institutional priority. Fiscal Year 2012 represents the third year of our plan to build a fund for asset renewal and replacement (ARR)—prior to Fiscal Year 2010, the College's operating budget did not include funding for depreciation or ARR. In order to fully fund ARR, the College will need to add approximately \$10 million to the operating budget. To that end, the

Percentage of Students Receiving Financial Aid Grant Assistance

Funding Source for Financial Aid

Restricted

College is implementing a phased-in approach to this funding need, with a funding increase each fiscal year. As of June 30, 2012, the College has accumulated a balance of \$3.5 million in the ARR fund.

President Bottomly formed a steering committee, Wellesley 2025: A Plan for Campus Renewal, at the end of last year, co-chaired by the provost and the vice president for finance. The group was charged with helping to develop a long-term plan establishing a prioritized schedule of capital improvements over the next 10 to 15 years, based on both facilities needs and institutional goals and priorities, and requiring a thoughtful planning process that will establish the guiding principles and priorities that are so critical to positioning Wellesley for the future. Despite considerable investment in renovation and construction over the past 10 years, 82 percent of our buildings have not had a major renovation in more than 25 years and 62 percent have not had a major renovation in more than 50 years; in some parts of the campus, the College's infrastructure systems are more than 75 years old. In short, our facilities needs are significant, and we are developing an orderly, longterm plan to address them.

Future Challenges and Outlook

The College's set of principles for financial strength and flexibility continues to guide planning as we confront budget issues resulting from the fallout of the tumultuous economic events of Fiscal Year 2009. At the same time, we must strive to improve Wellesley's buildings and preserve infrastructure, develop programs, and stay competitive in recruiting students. The development of an integrated long-term financial plan to support the new comprehensive facilities goals is key to ensuring that Wellesley will continue to achieve its high academic standards and uphold its institutional values.

B Evaus

Respectfully submitted,

Andrew B. Evans

Vice President for Finance and Treasurer

Report of the Chief Investment Officer

October 2012

To the Board of Trustees of Wellesley College

On June 30, 2012, the Wellesley College endowment had a market value of \$1.445 billion, vs. \$1.500 billion on June 30, 2011—a decrease of \$55 million. The investment return for the fiscal year earned by the endowment portfolio was 0.7 percent (net of investment management fees).

Fiscal 2012 Developments

Fiscal Year 2012 was a roller-coaster year in financial markets. Global equity markets were down sharply in the first half of Fiscal Year 2012, but rebounded in the second half, with nearly all of the price return of the S&P 500 in the last several weeks of June. Against this backdrop, the investment return of the endowment was 0.7 percent. Although the endowment enjoyed good returns from private equity and fixed income, results were hurt by exposure to non-U.S. equities and

real assets. Investment returns by asset class—and the relative performance vs. benchmarks for each asset class—are summarized below.

Longer-Term Results

Compound annual returns over the last five and 10 years were 2.2 percent and 7.7 percent respectively (net of investment management fees). These results are lower than the College's need for returns that cover both spending and inflation, but 10-year results improved as compared with the prior year. Long-term performance also remains strong relative to alternative strategies; the College's well-diversified endowment has significantly outperformed U.S. equity investments (represented by the S&P500), as has the 65 percent stock/35 percent bond portfolio, as shown below. Continued exposure to alternative asset-classes with higher long-term return expectations has been important to improving longer-term portfolio results.

Total Return by Asset Class Year Ended June 30, 2012

	Wellesley Return	Market Be	enchmark/Comparative Index
U.S. Equity	5.3%	5.4%	S&P 500
International Equity	(13.6)	(14.6)	MSCI AC World Ex-U.S.
Private Equity	6.9		Cambridge Associates (1)
Real Assets	(3.4)		Real Assets Benchmark (2)
Semi-marketable (3)	2.3	(1.9)	Cambridge Associates Hedge Fund-of-Funds Index
Fixed Income	14.3	14.6	Fixed Income Benchmark (4)
Total Portfolio	0.7%		

- 1 Private Equity results are measured against the Cambridge Associates Private Equity, Venture Capital and Distressed Indices, with final results not yet reported at the time of this writing.
- 2 Real Assets Benchmark is a weighted average of the NCREIF Timber, Cambridge Associates Real Estate and the Cambridge Associates Natural Resources Index (x-Timber). Final returns have not yet been reported at the time of this writing.
- $3\,$ Semi-marketable investments include absolute return and hedge funds.
- 4 Fixed Income Benchmark is a weighted average of the Barclays 5+ Year Treasury Index, Barclays >5 Year TIPS Index and the Citigroup World Government Bond Index.

Total Annualized Return on Endowment, Year Ended June 30, 2012

	3 years	5 years	7 years	10 years
Wellesley Portfolio	9.9%	2.2%	6.6%	7.7%
S&P 500 Index	16.4	0.2	4.1	5.3
65/35 Stock/Bond Portfolio (5)	6.6	13.3	3.0	5.8

⁵ A commonly used measure of portfolio performance is a comparison with a passive portfolio consisting of 65% stocks, as measured by the S&P 500 Index, and 35% bonds, as measured by the Citigroup Broad Investment Grade Index.

Policy Portfolio and Strategy Going Forward

The Policy Portfolio established by the Wellesley College Investment Committee guides asset allocation with the goal of balancing long-term returns and risks. Over the last decade, the endowment has diversified into less-efficient asset classes, such as venture capital, distressed debt, and energy. The Investment Committee, together with the Investment Office team, regularly reviews the assumptions and expectations upon which the Policy Portfolio is based; the goal is to refine the assets held in the Wellesley portfolio in order to provide optimal risk/return characteristics over the long run. In executing this investment strategy, the Investment Office team works to add value within asset classes through the selection of outstanding investment managers.

The table below details the Policy Portfolio and the actual asset allocation as of June 30, 2012.

Asset Allocation as of June 30, 2012

Asset Class	Policy Portfolio	Asset Allocation
U.S. Equities	19%	19%
International Equities	19	16
Total Equities	38	35
Private Equity	16	20
Real Assets	16	17
Semi-marketable	20	18
Total Alternative Asse	ets 52	55
Fixed Income & Cash	n 10	10
Total Portfolio	100%	100%

Exposure to total long-term alternative assets comprised 55 percent of the portfolio, relative to a long-term target of 52 percent. Relative to the long-term Policy Portfolio targets, our endowment portfolio was underweight in international equities. The portfolio has sufficient exposure to liquid investments to maintain the endowment's financial support to the College's operations and to provide for portfolio liquidity needs.

As developed economies continue to deal with challenging economic conditions that were years in the making, financial markets are likely to remain volatile. The Investment Office and the Investment Committee remain focused on long-term growth to ensure that the endowment continues to support the College's mission. I believe that the College will be well served by its strategy of broad diversification across asset classes, geographies, and strategies, as well as by the excellent investment managers whom we employ.

Members of the College community with questions, suggestions, or thoughts about the management of the Wellesley College endowment are invited to contact me at any time.

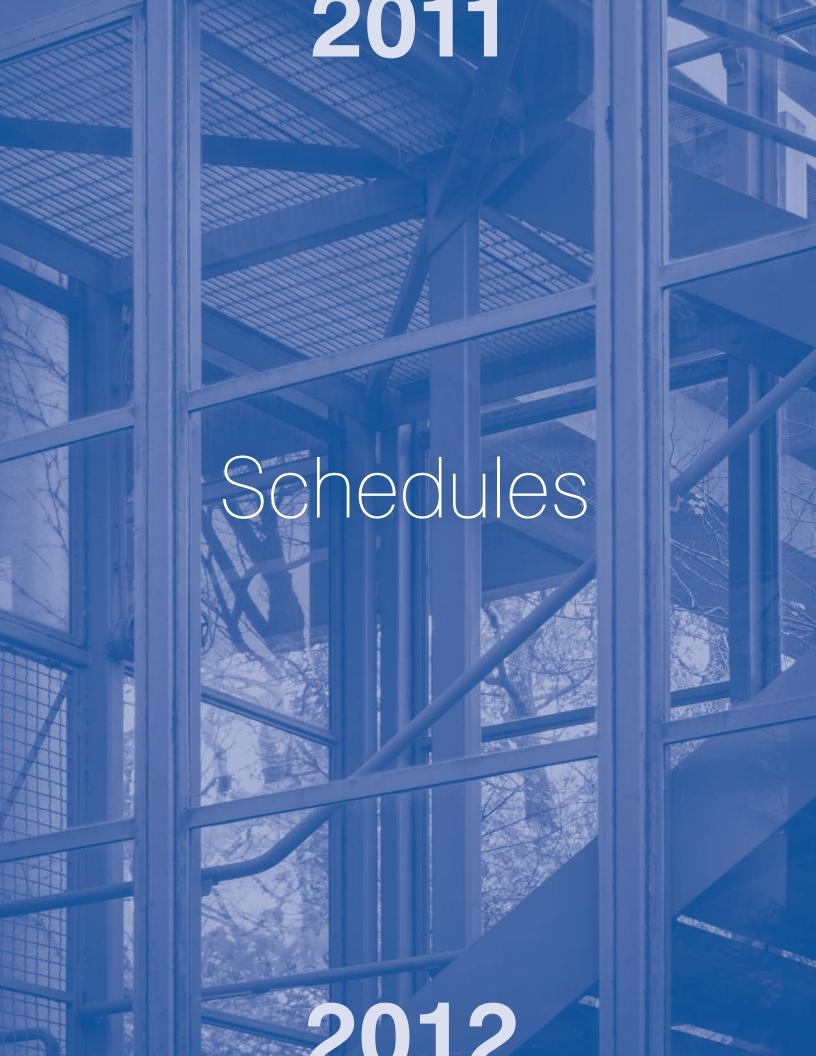

Thank you.

Sincerely,

Deborah F. Kuenstner Chief Investment Officer

^{*} For reporting purposes, beginning in 2007, market value and all return figures are reported based on the general investment pool excluding faculty mortgages.

Report of Independent Auditors

To the Board of Trustees of Wellesley College:

Pricewaterhouse Coopers UP

In our opinion, the accompanying statements of financial position and the related statements of activities and cash flows present fairly, in all material respects, the financial position of Wellesley College (the "College") at June 30, 2012 and 2011, and the changes in its net assets and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the College's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

October 24, 2012

The accompanying notes are an integral part of these financial statements.

Wellesley College Notes to the Financial Statements

June 30, 2012 and 2011

1. Summary of Significant Accounting Policies

(a) Basis of Presentation

The financial statements of Wellesley College (the "College") have been prepared in accordance with accounting principles generally accepted in the United States of America using the accrual basis of accounting.

Resources are reported for accounting purposes in separate classes of net assets based on the existence or absence of donor-imposed restrictions. In the accompanying financial statements, net assets that have similar characteristics have been combined into similar categories as follows:

Unrestricted—Net assets that are not subject to donor-imposed stipulations. These include all revenues, expenses, gains and losses that are not changes in permanently or temporarily restricted net assets. This category includes realized and unrealized gains and losses on unrestricted endowment. Unrestricted net assets may be designated for specific purposes by action of the Board of Trustees or may otherwise be limited by contractual agreements with outside parties. Unrestricted net assets generally result from revenues derived from providing services, receiving unrestricted contributions, unrealized and realized gains and losses on unrestricted endowment, and receiving dividends and interest from investing in income producing assets, less expenses incurred in providing services, raising contributions, and performing administrative functions.

Temporarily restricted—Net assets that are subject to donor-imposed stipulations that can be fulfilled by actions of the College pursuant to those stipulations or that expire by the passage of time. This category includes realized and unrealized gains and losses on the permanent endowment. Temporarily restricted net assets generally result from contributions and other inflows of assets whose use by the organization is limited by donor-imposed stipulations or by law that either expire by passage of time or can be fulfilled and removed by actions of the College pursuant to those stipulations.

Permanently restricted—Net assets that are subject to donor-imposed stipulations that they be maintained permanently by the College. Generally, the donors of these assets permit the College to use all or part

of the investment return on these assets. Such assets primarily include the College's permanent endowment funds. Permanently restricted net assets generally represent the historical cost (market value at date of gift) of contributions and other inflows of assets whose use by the College is limited by donor-imposed stipulations that neither expire by the passage of time nor can be fulfilled or otherwise removed by the College.

Expenses are reported as decreases in unrestricted net assets. Expirations of donor-imposed stipulations that simultaneously increase one class of net assets and decrease another are reported as reclassifications between the applicable classes of net assets.

Contributions restricted for the acquisition of land, buildings and equipment are reported as temporarily restricted revenues. These contributions are reclassified to unrestricted net assets upon acquisition of the assets or placed in service dates if the asset is constructed.

Nonoperating activities reflect transactions of a long-term investment or capital nature including contributions to be invested by the College to generate a return that will support future operations, contributions to be received in the future, contributions to be used for facilities and equipment, and investment return beyond what the College has appropriated for current operational support in accordance with the College's investment return spending guidelines. Nonoperating activities also include net realized and unrealized gains and losses on the interest rate swap and pension related changes other than net periodic pension cost.

(b) Cash and Cash Equivalents

Cash and cash equivalents include short-term, highly liquid investments with a maturity of three months or less at the time of purchase. Cash and cash equivalents representing endowment assets and planned giving assets are included in investments and planned giving investments, respectively. Restricted cash represents amounts for construction held by trustees in association with the Massachusetts Development Finance Agency Series J bond issue and amounts restricted by a donor for the Science Center and Power Plant.

(c) Investments

Investments in marketable securities are carried at fair market value as established by the major securities markets. Purchases and sales of investments are recorded on the trade date of the transaction. Realized gains and losses arising from the sales of investments are recorded based upon the average cost of investments sold. Investment income is recorded on the accrual basis. The investment in faculty mortgages is stated at unpaid principal balances.

Venture capital and buyout limited partnerships include investments in both publicly and privately owned securities. The fair values of private investments are determined by the College and based on estimates and assumptions of the general partners or partnership valuation committees in the absence of readily determinable public market values. These values are audited annually by other auditors, most typically based on calendar year end information. The limited partnership valuations consider variables such as the financial performance of the investments, recent sales prices of similar investments and other pertinent information. The estimated values as determined by the general partners and investment managers may differ significantly from the values that would have been used had a ready market for the investments existed and the differences could be materially higher or lower.

Derivative investments in the College's portfolio may include currency forward contracts, currency and interest rate swaps, call and put options, exchangetraded futures contracts, debt futures contracts and other vehicles that may be appropriate in certain circumstances as permitted within the managers' investment guidelines. The College's external investment managers use investments in derivative securities predominantly to reduce interest rate risk and risk in the foreign fixed income market.

The College's split-interest agreements with donors consist of irrevocable charitable gift annuities, pooled life income funds, charitable remainder unitrusts and annuities and perpetual trusts. Unitrusts, in which the College has a remainder interest, but that are held in trust and administered by outside agents, have been recorded as gifts that are temporarily restricted. Unitrusts, in which the College has a remainder interest, and which are managed by the College, periodically pay income earned on the assets to designated beneficiaries. The College adjusts unitrusts for both the estimated return on the invested assets and the contractual payment obligations during

the expected term of the agreement. For planned giving contracts, the contributed assets are included at fair value within planned giving investments on the Statement of Financial Position. Contribution revenues are recognized as of the date the donated assets are transferred to the College and liabilities are recorded for the present value of the estimated future payments to the donors or other beneficiaries. The liabilities are adjusted during the term of the planned giving contracts consistent with changes in the value of the assets and actuarial assumptions.

Net gains on permanently restricted gifts are classified as temporarily restricted until appropriated for spending by the College in accordance with the Massachusetts Management of Institutional Funds Act, as updated in 2009. Future utilization of gains is dependent on market performance.

Deficiencies of \$1,535,000 and \$472,000 for donorrestricted endowment funds, resulting from declines in market value, have been offset by an allocation from unrestricted net assets to temporarily restricted net assets for the years ended June 30, 2012 and 2011, respectively. As the market value of the portfolio increases, the deficiency will decrease.

(d) Endowment Investment Return Spending Policy

The College has adopted endowment investment and spending policies that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of endowment assets. The College's investment strategy is based on a long-term Policy Portfolio that serves as a guide for asset allocation. The Policy Portfolio was established with the goal of balancing long-term returns and risks by increasing portfolio diversification through the allocation of assets to less efficient asset classes. The return objective for the endowment assets, measured over a full market cycle, is to maximize the return against a blended index, based on the endowment's target allocation applied to the appropriate individual benchmarks. The College uses a "total return" approach to managing endowment assets in which investment returns are achieved through both capital appreciation (realized and unrealized gains) and current yield (interest and dividends). Funds are invested to maximize total return consistent with prudent risk without regard to the mix of current investment income and realized and unrealized gains or losses.

In October 2010, the Board of Trustees approved a revised Endowment Spending Policy effective for the year ended June 30, 2012. Wellesley's revised Endowment Spending Policy is based on a combination of the prior year's spending and prior year's endowment value with a weighting of 80% and 20%, respectively. The amount of allowable spending will be capped at 5.5% or no less than 4.0% of the average of the last three endowment values adjusted for inflation, with a target of approximately 4.5% of the prior year endowment market value. The sources of the payout are endowment earned income (interest and dividends), both current and previously reinvested income and a portion of realized gains. Any income earned in excess of the spending limit is reinvested. Funds may be withdrawn from investment return earned in prior years if income is less than the spending limit. The spending policy is designed to insulate investment policy from budgetary pressures, and to insulate program spending from fluctuations in capital markets.

(e) Inventories

Inventories are stated at the lower of cost (first-in, first-out method) or market and are included in prepaid, inventory and other assets on the Statement of Financial Position.

(f) Accounts Receivable and Student Loans Receivable

Accounts receivable include amounts due from students, student organizations and other miscellaneous receivables. Loans to students are carried at net realizable value. Accounts receivable for 2012 and 2011, are reported net of allowances for doubtful accounts of \$272,000 and \$311,000, respectively. Loans receivable for 2012 and 2011, are reported net of allowances for doubtful loans of \$694,000 and \$756,000, respectively. The provisions are intended to provide for student accounts and loans that may not be collected.

Determination of the fair value of student loan receivables is not practicable as such loans are primarily federally sponsored student loans with U.S. Government mandated interest rates and repayment terms subject to significant restrictions as to their transfer and disposition.

(g) Grant Revenue

Government grants normally provide for the recovery of direct and indirect costs, subject to audit. The College recognizes revenue associated with the direct costs as the related costs are incurred or expended. Recovery of related indirect costs is generally

recorded at predetermined fixed rates negotiated with the government or at other predetermined rates determined by the grant provider.

(h) Pledges

The College recognizes the present value of unconditional promises to give as revenues in the period in which the pledges are made by donors.

(i) Land, Buildings, and Equipment

Land, buildings, and equipment are recorded at cost, or if donated, at fair market value at the date of donation. Additions to plant assets are capitalized while scheduled maintenance and minor renovations are charged to operations. Library books are expensed when purchased. Museum collections are not capitalized. Plant assets are presented net of accumulated depreciation. When assets are retired or disposed of, the cost and accumulated depreciation are removed from the accounts and gains and losses from disposal are included in the Statement of Activities. Depreciation is computed on a straightline basis over the estimated useful lives of the related assets as follows:

	Years
Land improvements	20-40
Buildings and building improvements	20-40
Equipment	4-12

(j) Financial Aid

The Statement of Activities reflects financial aid as an offset to tuition and fee revenues. The College's financial aid is primarily funded through private gifts, grants and endowment income with the remainder, if needed, representing unrestricted institutional resources for grants.

(k) Auxiliary Operations

Auxiliary operations include residence and dining halls, the Nehoiden Golf Club, the Wellesley College Club, which operates a private dining and conference center, and use of the campus during the summer by internal and external groups. Related expenses include direct expenses of running these operations as well as an allocation for depreciation, debt service and physical plant maintenance and operation.

(1) Internal Revenue Code Status

The College has been granted tax-exempt status as a non-profit organization under Section 501(c)(3) of the Internal Revenue Code.

(m) Asset Retirement Obligations

The College recognizes the fair value of a liability for legal obligations associated with asset retirements in the period in which the obligation is incurred. When the liability is initially recorded, the cost of the conditional asset retirement obligation is capitalized by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value each period, and the capitalized cost associated with the retirement obligation is depreciated over the useful life of the related asset. Upon settlement of the obligation, any difference between the cost to settle the asset retirement obligation and the liability recorded is recognized as a gain or loss in the Statement of Activities.

(n) Interest Rate Swap

The College has entered into an interest rate swap agreement on the Massachusetts Development Finance Agency, Variable Rate Revenue Bonds, Series I in order to convert the variable rate debt to fixed rate, thereby economically hedging against changes in the cash flow requirements of the College's variable rate debt obligations.

Net payments or receipts (difference between variable and fixed rate) under the swap agreement along with the change in fair value of the swap are recorded in nonoperating activities as net realized/unrealized loss on interest swap.

(o) Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(p) New Accounting Pronouncements

On July 1, 2010, the College adopted new guidance enhancing the Fair Value Measurement standard. This standard requires further disclosure of significant transfers in and out of Level 1 and Level 2 fair value measurements, including the reasons for the transfers, and requires discussions of their fair value measurement disclosures on a disaggregated basis. On July 1, 2011, the College adopted the remaining enhancement of this standard. This standard required disclosure on the activity in the Level 3 rollforward to be reported gross, rather than net, basis.

On July 1, 2010, the College adopted the accounting standard, Credit Quality. This standard requires the disclosure about the credit quality of financing receivables and the related allowance for credit losses. See section (f) of this note for additional information.

(q) Reclassifications

Certain amounts from the 2011 financial statements have been reclassified to conform to the 2012 presentation.

2. Contributions Receivable

Contributions receivable, net, is summarized as follows at June 30 (\$000s):

Unconditional promises		
expected to be collected in:	2012	2011
Less than one year	\$3,943	\$3,086
One year to five years	47,668	46,513
Over five years	1,120	3,458
Total	52,731	53,057
Less discounts and allowance		
for uncollectible accounts	4,247	5,277
Net contributions receivable	\$48,484	\$47,780

Contributions receivable expected to be collected within one year are recorded at their net realizable value. Those expected to be collected in future years are recorded at the present value of estimated future cash flows. The present value of estimated future cash flows has been measured at the time of the contribution using rates indicative of the market and credit risk associated with the contribution. Discount rates used to calculate the present value of contributions receivable ranged from 2.6% to 5.10%, and 2.10% to 5.10% at June 30, 2012 and 2011, respectively.

3. Land, Buildings and Equipment

Investment in land, buildings and equipment consists of the following at June 30 (\$000s):

	2012	2011
Land and land improvements	\$50,226	\$50,226
Buildings and building improvements	439,023	427,289
Equipment	8,395	8,641
Construction in progress	5,635	9,520
	503,279	495,676
Less: accumulated depreciation	203,575	188,116
	\$299,704	\$307,560

Depreciation expense was \$15,959,000 and \$15,644,000 for the years ended June 30, 2012 and 2011, respectively.

The College recognized \$830,000 and \$815,000 of operating expenses relating to the accretion of liabilities recorded for the years ended June 30, 2012 and 2011, respectively. Conditional asset retirement obligations of \$19,781,000 and \$18,951,000 at June 30, 2012 and 2011, respectively, are the College's asset retirement obligation presented in the Statement of Financial Position.

4. Investments

The book and market values of investments at June 30, 2012 and 2011 are shown in Table 4 on page 32.

The absolute return alternative asset investments include equity hedge funds, risk arbitrage, distressed securities and commodity hedge funds. The College's investments in these strategies use minimal, if any, leverage as part of their strategies.

Included in bonds and equities are alternative investment vehicles including hedge funds with a market value of \$258,593,000 and \$295,521,000 and commingled funds with a market value of \$189,961,000 and \$244,671,000 at June 30, 2012 and 2011, respectively, whose holdings are bonds and equities.

The College is currently invested in exchangetraded futures contracts. The College uses these instruments to maintain target exposures to certain equity markets. At June 30, 2012, the College had long futures exposures with a net ending fair value of \$9,698,000. The net loss from these derivative instruments at June 30, 2012 was \$7,659,000, and is included in the investment return on the Statement of Activities.

The College's investment return from endowment and planned giving investments for the years ended June 30, 2012 and 2011 (\$000s) appears in Table 5 on page 33.

The total return consisting of realized and unrealized gains and losses and dividends and interest net of investment management and custodial fees was 0.75% and 20.36% for the fiscal years ended June 30, 2012 and 2011, respectively.

At June 30, 2012 and 2011 investment securities having a fair value of \$937,000 and \$1,188,000 respectively, were loaned to various brokerage

firms through a securities lending agent. The loaned securities are returnable on demand and are collateralized by cash deposits. The College has recorded the fair value of the collateral received of \$963,000 and \$1,217,000 and an offsetting liability for the return of the collateral on the Statement of Financial Position at June 30, 2012 and 2011, respectively.

5. Fair Value Disclosures

The College has established a framework for measuring fair value under generally accepted accounting principles (GAAP). Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering assumptions, the College follows a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- •Level 1—Observable inputs such as quoted prices in active markets;
- Level 2—Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3—Unobservable inputs in which there is little or no market data.

Table 6 on page 33 presents information about the College's assets and liabilities measured at fair value on a recurring basis based upon the lowest level of significant input to the valuations at June 30, 2012 and 2011.

Interest rate swaps are valued at the present value of the series of net cash flows resulting from the exchange of fixed-rate payments for floating rate payments over the remaining life of the contract from balance sheet date. Each floating rate payment is calculated based on forward market rates at valuation date for each respective payment date. Inputs to determine discount factors and forward rates include market prices for reference securities, yield curves, credit curves, measures of volatility, prepayment rates, assumptions for nonperformance risk, and correlations of such inputs. Certain inputs are unobservable; therefore the fair value is categorized as level 3.

Table 7 on page 34 presents the assets and liability carried at fair value as of June 30, 2012 and 2011 that are classified within level 3 of the fair value hierarchy. The table reflects gains and losses for the year, including gains and losses on assets and liabilities that were transferred to level 3 during the year, for all assets and liabilities categorized as level 3. Additionally, both observable and unobservable inputs may be used to determine the fair value of positions that the College has classified within the level 3 category. As a result, the unrealized gains and losses for assets and liabilities within level 3 may include changes in fair value that were attributable to both observable and unobservable inputs.

As a result of the reissued FASB accounting standards related to estimating fair value of investments, \$13,831,000 and \$8,814,000, has been reclassified from level 3 to level 2, for the years ended June 30, 2012 and June 30, 2011, respectively. The College reclassified \$47,335,000 and \$13,128,000 from level 3 to level 1 for the years ended June 30, 2012 and June 30, 2011, respectively. The College had no transfers from level 2 to level 1 in the current year.

The amount of total gains or losses for the year included in Investment Return in the Statement of Activities attributed to the change in unrealized gains or losses relating to assets still held at June 30, 2012 and 2011 are \$(83,710,000) and \$199,897,000, respectively.

The College uses Net Asset Value (NAV) or its equivalent to determine the fair value of certain investments, which may not have a readily determined fair value. These investments also have various redemption restrictions and redemption terms. Table 8 on page 35 presents investments measured at NAV as of June 30, 2012 and 2011.

Beneficial interests in outside trusts held by third parties are valued at the present value of distributions expected to be received over the term of the agreement. Inputs used to value the College's interest in these trust are considered unobservable and are categorized as level 3.

6. Pooled Funds

Endowment and similar fund assets are pooled on a unit market value basis whenever possible. Funds are added to or withdrawn from the pool at the unit market value at the beginning of the fiscal quarter in which the transaction takes place.

Pooled funds at June 30, 2012 and 2011 are shown in Table 9 shown on page 35.

The components of the pooled and nonpooled endowment funds at market value at June 30, 2012 and 2011 (\$000s) are shown in Table 10 on page 36.

7. Related Parties

The College acts as fiscal agent and investment advisor for the Wellesley College Alumnae Association and a retired president of the College. Endowment investments held on their behalf are included in the College's general pool of investments and are reflected either as part of the College's net assets or a pension liability. The market value of the assets totaled \$13,854,000 and \$14,139,000 at June 30, 2012 and 2011, respectively.

Mortgages due from faculty of \$23,761,000 and \$23,580,000 at June 30, 2012 and 2011, respectively, are included within investments on the Statement of Financial Position.

Table 4: Book and Market Values of Investments

June 30, 2012 and 2011 (in \$000s)

	2012 Book Value	2012 Market Value	2011 Book Value	2011 Market Value

8. Notes and Bonds Payable

Indebtedness at June 30, 2012 and 2011 includes various bonds issued through the former Massachusetts Health and Education Facilities Authority (the Authority). On October 1, 2010, pursuant to certain provisions of Chapter 240 of the Acts of 2010 of the Massachusetts Legislature, signed into law by the Massachusetts governor on August 5, 2010, the Authority was merged into the Massachusetts Development Finance Agency (MDFA). Interest payments on debt totaled \$3,574,000 and \$2,748,000 during fiscal years 2012 and 2011, respectively.

During January 2008, the College issued \$57,385,000 in Series I tax-exempt variable rate demand bonds. The proceeds will be used for major asset preservation and modernization projects and were used to retire the Series F bonds, with \$30.0 million outstanding, on July 1, 2009, the earliest possible call date. The refunding allows the College to realize the present value savings through a restructuring of the College's debt. At June 30, 2011, restricted cash included \$1,806,000 of construction funds held by trustees that were drawn down to fund various construction projects. All funds were drawn down during the fiscal year ended June 30, 2012.

The Series I bonds, which mature in 2039, currently bear variable interest rates payable monthly. Interest

on the bonds is calculated on the basis of twelve thirty-day months for a 360-day year. Pending the redemption of the Series F bonds, proceeds of the Series I bonds were deposited into a refunding account established under the indenture and held by the Trustee and were invested in authorized investments as directed by the College. At June 30, 2009, the trust fund of \$31,069,000 was available to service principal and interest obligations, which was fully repaid on July 1, 2009. Since the refunded bonds are no longer deemed to be outstanding for financial reporting purposes, neither the debt nor the irrevocable trust assets are included in the Statement of Financial Position.

During April 2012, the College issued \$49,800,000 in Series J tax-exempt bonds. The bonds mature in 2042. The proceeds will be used for major asset preservation and modernization projects. The College incurred bond issue costs of \$499,000 associated with the issue which have been capitalized and are being amortized over the life of the bonds. At June 30, 2012, restricted cash included \$55,001,000 of construction funds held by trustees that will be drawn down to fund various construction projects.

During April 2012, the College issued \$99,210,000 in Series K taxable bonds. The bonds mature in 2042. The proceeds will be used for major asset preservation and modernization projects and will

be used to retire \$50,040,000 of Series H bond debt. The College recognized a debt extinguishment charge of \$2,430,000 which has been reflected in the statement of activities. The refunding allows the College to realize the present value savings through a restructuring of the College's debt. The College incurred costs of \$525,000 associated with the issue which have been capitalized and are being amortized over the life of the bonds. At June 30, 2012, operating investments included \$45,566,000 of construction funds that will be drawn down to fund various construction projects.

The College has two lines of credit with different banks. The College may borrow up to \$40 million with various terms and interest rates at LIBOR plus 1/5 of 1%. There were no amounts outstanding under this line of credit as of June 30, 2012 and 2011. The second line of credit was secured in February, 2012. The College may borrow up to \$50 million with various terms and interest rates. This line of credit expires on February 10, 2015. There were no amounts outstanding as of June 30, 2012.

Balances of outstanding bonds and notes payable at June 30 consisted of the following (\$000s):

	2012	2011
MDFA, Series I, Variable Rate Demand Bonds, bearing interest		
at a daily rate, maturing July 2039. The rate at June 30, 2012 was 0.13%.	\$57,385	\$57,385
MDFA, Series H, Revenue Bonds issued at an interest rate of 4.0%		
to 5.0% maturing July 2033.	925	51,870
MDFA, Series G, Variable Rate Demand Bonds, bearing interest		
at a daily rate, maturing July 2039. The rate at June 30, 2012 was 0.13%.	20,000	20,000
MDFA, Series E, Variable Rate Demand Bonds, bearing interest		
at a daily rate, maturing July 2022. The rate at June 30, 2012 was 0.15%.	10,400	11,200
MDFA, Series J, Revenue Bonds issued at an interest rate of 5.0%		
maturing 2042.	49,800	_
Wellesley College, Series K, Taxable Bonds, bearing interest		
at a rate of 0.782% to 4.196%, maturing 2042.	99,210	_
Notes Payable Promissory Note, principal maturing November 2012.		
The rate at June 30, 2012 was 1.48%.	7,135	7,174
Total debt	244,855	147,629
Less unamortized bond issue costs	(1,489)	(797)
Add unamortized original issue premium	5,654	889
	\$249,020	\$147,721

The total of the College's bonds and notes payable described above matures as follows (\$000s):

2013	\$8,860
2014	2,415
2015	2,695
2016	2,855
2017	3,020
Thereafter	225,010
Total bonds and notes payable	\$244,855

In order to reduce exposure to floating interest rates on variable rate debt, in January 2008, the College entered into an interest rate swap agreement, with a term through 2039. This swap effectively locks in a fixed rate of 3.239% per annum. The agreement has a notional amount of \$57,385,000. At June 30, 2012 and 2011, the market value of the swap agreement amounted to a liability of \$16,253,000 and \$4,933,000, respectively. The fair value of the swap is the estimated amount that the College would receive or pay to terminate the agreement at the reporting date, taking into account current interest rates and the current credit worthiness of the swap counterparties. The value of the interest rate swap is reflected within accounts payable and accrued expenses on the Statement of Financial Position. The change in fair value resulted in a loss of \$11,320,000 in 2012 and a gain of \$1,883,000 in 2011 reflected in nonoperating activities on the Statement of Activities. Additionally, the College paid net interest expense in association with the swap agreement of \$1,765,000 and \$1,761,000 which is reflected as part of the net realized/unrealized loss/gain on interest swap for the years ended June 30, 2012 and 2011, respectively. This financial instrument necessarily involves counterparty credit exposure and the College's own nonperformance risk. The counterparty for this swap agreement is a major financial institution that meets the College's criteria for financial stability and credit-worthiness.

The College has outstanding at June 30, 2012 fixed rate debt of \$149,935,000 and variable rate debt of \$87,785,000. Included in variable rate debt is \$57,385,000 of synthetic fixed debt which is debt that has an underlying variable rate but has an interest rate swap agreement that effectively locks in a fixed rate. The fair market value of the College's fixed rate debt at June 30, 2012 approximates \$165,853,000. The College's variable rate debt approximates fair value. Fair value for fixed and variable rate debt is based on estimates using current interest rates available for debt with equivalent maturities.

In the event that the College receives notice of any optional tender on its variable-rate bonds, or if the bonds become subject to mandatory tender, the purchase price of the bonds will be paid from the remarketing of such bonds. However, if the remarketing proceeds are insufficient, the College will be obligated to purchase the bonds tendered with internal liquidity.

9. Annuities and Unitrusts Payable

The College has split-interest agreements consisting primarily of annuities, pooled life income funds, and charitable remainder unitrusts for which the College may or may not serve as trustee. All splitinterest agreements are included in planned giving investments. Contributions are recognized at the date the trusts are established net of a liability for the present value of the estimated future cash outflows to beneficiaries. The present value of payments is discounted at a rate of return that ranges from 4% to 6%. The liability of \$36,134,000 and \$38,677,000 at June 30, 2012 and 2011, respectively, is adjusted during the term of the agreement for changes in actuarial assumptions. Payments of income to beneficiaries are principally funded by the investment income of the related gift annuity and unitrust investments.

10. Pension Plans

The College has a defined contribution, noncontributory annuity pension plan for faculty and administrative personnel administered by the Teachers Insurance and Annuity Association and College Retirement Equities Fund (TIAA/CREF). Under this Plan, the College contributed \$7,900,000 and \$7,627,000 respectively, for the years ended June 30, 2012 and 2011.

The College also has a defined benefit pension plan for classified office and service employees. The Plan provides retirement and death benefits based on the highest thirty-six months of consecutive earnings. Contributions to the plan are made in amounts sufficient to meet the minimum funding requirements set forth in the Employee Retirement Income Security Act of 1974.

The measurement date of determining the benefit obligations and net periodic benefit cost was June 30, 2012 and 2011.

	2012	2011
Assumptions used to determine be	enefit obligati	ions:
Discount rate	4.000%	5.500%
Rate of compensation increase	3.500%	3.500%
Assumptions used to determine ne	et periodic be	enefit cost:
Discount rate	5.500%	5.375%
Expected return on plan assets	7.200%	7.800%
Rate of compensation increase	3.500%	4.000%
Change in projected benefit obliga	tion (\$000s)	
Benefit obligation at end		
of prior year	\$46,908	\$46,621
Service cost		
(including expense load)	1,533	1,629

Cost of prior events/net	291	841		
	\$1,805	\$2,852		
Net periodic benefit cost	\$1,00)	\$2,672		
New net actuarial loss/(gain)	\$15,412	\$(6,705)		
Net loss on benefit costs	(1,485)	(989)		
Amortization of prior service cost	(64)	(64)		
Total	\$13,863	\$(7,758)		
Amounts recognized in the Statem	ent of Finar	ncial		
Position consist of a liability	\$(25,472)	\$(11,610)		
Amounts recognized in unrestricted net assets				
Net prior service cost	\$281	\$345		
Net actuarial loss/(gain)	13,582	(8,103)		
Total unrestricted net asset	\$13,863	\$(7,758)		

The amount expected to be recognized as amortization of prior net service and the (gain)/loss to be recognized both as components of net periodic cost in both years are \$64,500.

Expected benefit payments, net of participant contributions, are as follows (\$000s):

2013	\$1,646
2014	1,764
2015	1,920
2016	2,126
2017	2,358
2018–2022	15,577

The College expects to make employer contributions into the plan of \$3,000,000 in the 2013 fiscal year.

In selecting the long-term rate of return on assets, the College considered the average rate of earnings expected on the funds invested or to be invested to provide for the benefit of the Plan. This included

considering asset allocation and the expected returns likely to be earned over the life of the Plan as well as assessing current valuation measures, income, economic growth and inflation forecasts, and historical risk premiums. This basis is consistent with prior years.

The investment objective and strategy of the Plan is to achieve returns above the balanced composite benchmark and maintain a level of volatility which approximates that of the composite benchmark using the following asset allocation:

Asset Category	Target Allocation
Equity securities	60%
Real estate investment trust	5%
Commodities	5%
Fixed income	27%
Cash and cash equivalents	3%
Total	100%

The following lists the Plan's asset allocation at June 30, 2012 and 2011:

	Value at		
Asset Category	June 30, 2012	2012	2011
Equity securities	\$23,640	63%	63%
Real estate investment trus	t 1,500	4%	3%
Commodities	1,788	5%	5%
Fixed income	10,031	27%	27%
Cash and cash equivalents	497	1%	2%
Total	\$37,456	100%	100%

All pension plan assets are level 2 assets, and all plan assets are in commingled funds.

The investment strategy for the pension assets is consistent with the approach to all other investment assets. The policies and strategies governing all investments for the College are designed to achieve targeted investment objectives while managing risk prudently. Risk management strategies include maintaining a diversified portfolio based on asset class, investment approach and security holdings. For the pension plan assets, an additional strategy is to maintain sufficient liquidity to meet benefit obligations as they become current.

11. Net Assets

Net assets consist of the following at June 30, 2012 and 2011:

(\$000s)	2012	2011
Unrestricted		
Designated for specific		
purposes and plant	\$106,804	\$142,746
Quasi-endowment	441,971	462,428
Deficiencies in donor-		
restricted endowments	(1,535)	(472)
	547,240	604,702
Temporarily restricted		
Endowment and similar		
funds including pledges	583,004	624,232
Annuity, life income and		
unitrusts including pledges	33,584	32,931
Deficiencies in donor-		
restricted endowments	1,535	472
Other restricted	50,809	52,572
	668,932	710,207
Permanently restricted		
Endowment including pledges	443,273	433,967
	443,273	433,967
	51,659,445	\$1,748,876

12. Endowment

In August 2008, guidance was issued on endowments of not-for-profit organizations related to net asset classification of funds subject to an enacted version of the Uniform Prudent Management of Institutional Funds Act, and additional guidance was issued on enhanced disclosures for all endowment funds, which, among other things, provides guidance on the net asset classification of donor-restricted endowment funds for a not-for-profit organization that is subject to an enacted version of the Uniform Prudent Management of Institutional Funds Act of 2006 (UPMIFA) and additional disclosures about an organization's endowment funds.

The College's endowment consists of approximately 3,800 individual funds established for a variety of purposes. The endowment includes both donorrestricted endowment funds and funds designated by the Board of Trustees to function as endowments. Net assets associated with endowment funds, including funds designated by the Board of Trustees to function as endowments, are classified and reported based on the existence or absence of donorimposed restrictions.

Table 19: Endowment Net Asset Composition by Type of Fund

As of June 30, 2012 (in \$000s)

		Temporarily	Permanently	
	Unrestricted	Restricted	Restricted	Total

13. Commitments and Contingencies

In 1975 the College identified the presence of soil tainted with various hazardous materials on the site of an abandoned 19th century paint factory acquired by the College in 1932. For the purposes of investigation and potential cleanup, the site has been segmented into various sub-areas, as follows: (1) the "Upper/Wetland/Pond" portion consisting of the former upland site of the paint factory, Paint Shop Pond, adjacent wetlands and Upper Waban Brook; (2) Lake Waban; and (3) Lower Waban Brook.

In 1991, the College arranged for the excavation of contaminated soils from two waste piles and a wastewater settling basin formerly associated with the paint factory. After the contaminated material was removed, the area was capped and seeded. These actions were undertaken in accordance with plans approved by the Department of Environmental Protection (DEP) on July 5, 1991. The College has continued to work with the DEP and has completed the process of remediating and restoring approximately 30 acres of land referred to as the Upland site. The College began in April 2001 excavating and consolidating contaminated soils from the upland, wetland, and pond ("Upland/ Wetland/Pond") portions of the site. The soils have been treated and consolidated on site under a permanent engineered barrier. The capped area has been developed into three playing fields, an eight lane all weather track, and a softball field and was completed in October 2002. The cost of this project was \$32.8 million; \$10 million has been funded from a MDFA bond issuance and the remainder from unrestricted endowment. Costs associated with the campus improvement project are capitalized as land improvements. Costs incurred to remediate this property are charged to expense when they can be estimated. Ongoing expenses associated with the monitoring and maintenance of the engineered barrier are charged to operations. Total expenses for this project were \$171,000 and \$75,000, respectively for the years ended June 30, 2012 and 2011. The College has purchased an insurance policy to cover cost overruns associated with the Upland/Wetland/ Pond project as well as the assessment, monitoring, and, if necessary, remediation of contaminated groundwater located under the Uplands/Wetlands/ Pond area. In September 2004, the College submitted a report to DEP recommending that no remedial action be taken in respect of the groundwater portion of the site beyond periodic monitoring of hexavalent chromium concentrations. DEP has not yet responded to this report.

In 2001, the Commonwealth of Massachusetts and the College entered an agreement pursuant to which the Commonwealth agreed to share in the cost of dredging the Northern Shoreline and Western Cove portion of Lake Waban, with the Commonwealth's share capped at \$1.4 million. The dredging project was completed in 2002 at a total cost of approximately \$1.2 million. Additional reimbursable costs of approximately \$100,000 were incurred after the completion of dredging. In three payments made in 2005 and 2006, the Commonwealth reimbursed the College a total of approximately \$1.06 million, fully satisfying the Commonwealth's reimbursement obligations under the 2001 cost-sharing agreement. In a report filed with DEP in May 2005, the College recommended that no remedial action be taken in portions of Lake Waban beyond the Northern Shoreline and Western Cove, apart from periodic monitoring of water quality and fish-growth patterns. DEP responded favorably to this report in a letter dated October 2005. The periodic monitoring program was initiated in 2008. The cost of this program is insignificant.

The Lower Waban Brook remedial project was originally anticipated to be undertaken in 2009 and was estimated to cost \$3,600,000. Early project designs based upon risk assessments and feasibility studies performed prior to 2000 were not embraced by all constituents as satisfactory. Additional hydrological data gathering has been undertaken in keeping with proposals still under review with DEP, with the intent to develop an updated feasibility study and remedy selection process. It is desirable but not yet clear whether a new process will result in material increases to previous project cost estimates. For the years ending June 30, 2012 and 2011 total expenses to the Lower Waban Brook remedial project were \$22,000 and \$26,000, respectively. A liability of \$2,777,000 and \$2,799,000 has been recorded as of June 30, 2012 and 2011, respectively and is included in the Statement of Financial Position within accounts payable and accrued expenses.

Outstanding commitments amounted to approximately \$169,863,000 and \$174,417,000 as of June 30, 2012 and 2011, respectively for the following:

	2012	2011
Alternative investments	\$165,652,000	\$174,239,000
Construction contracts	4,211,000	178,000
	\$169,863,000	\$174,417,000

Under the terms of certain limited partnership agreements, the College is obliged to periodically advance additional funding for private equity investments. Such commitments generally have fixed expiration dates or other termination clauses. The College maintains sufficient liquidity in its investment portfolio to cover such calls.

The College built a gas-fired cogeneration plant capable of producing 7.5 megawatts of electricity. The plant supplies electricity for the entire campus. The College pays the Town of Wellesley \$111,000 annually as a guarantee for back-up power, at cost, to the College. This contract is in force until May 2013. The College has several legal cases pending that have arisen in the normal course of its operations. The College believes that the outcome of these cases will have no material adverse effect on the financial position of the College.

14. Subsequent Events

The College has assessed the impact of subsequent events through October 24, 2012, the date the audited financial statements were available for issuance, and has concluded that there are no such events that require adjustment to the audited financial statements or disclosure in the notes of the audited financial statements.

Board of Trustees

2011-2012

Laura Daignault Gates

Charleston, South Carolina

Sidney R. Knafel

Vice Chair

New York, New York

Shelly Anand

Atlanta, Georgia

M. Amy Batchelor

Boulder, Colorado

Kenneth G. Bartels

Greenwich, Connecticut

Ruth J. Chang

Cincinnati, Ohio

Alison Li Chung

Chicago, Illinois

Alicia M. Cooney

Boston, Massachusetts

Debora de Hoyos

Chicago, Illinois

Alecia A. DeCoudreaux

Oakland, California

Thomas E. Faust, Jr.

Wellesley, Massachusetts

Sandra Polk Guthman

Chicago, Illinois

Judith B. Hale

Naples, Florida

Dorothy Chao Jenkins

Lakeland, Florida

Lynn Dixon Johnston

Hanover, New Hamsphire

William S. Kaiser

Wellesley, Massachusetts

Katherine Stone Kaufmann

Wellesley, Massachusetts

Stephen W. Kidder

Boston, Massachusetts

James T. Kloppenberg

Wellesley, Massachusetts

Ellen Goldberg Luger

Minneapolis, Minnesota

Laura R. Malkin

London, England

Ellen R. Marram

New York, New York

Pamela A. Melroy

Washington, District of Culumbia

Ioannis Miaoulis

Boston, Massachusetts

Nami Park

New York, New York

Beth K. Pfeiffer

Boston, Massachusetts

Elizabeth Strauss Pforzheimer

Scarsdale, New York

Susan Wagner

Mount Kisco, New York

Linda Wertheimer

Washington, District of Columbia

Mary H. White

New York, New York

Patricia J. Williams
